

New Product Information

CUSCO ZERO3 series for Mitsubishi Lancer Evolution - (CP9A) have been released

It's the coil over kit for radial tyre which offers wide range of setting from street to circuit. It absorbs heavy shock smoothly even on bumpy road.

Competition Zero-3

This "Competition spec" coil over kit is designed for dedicatedly proper or endurance circuit driving wearing S-tire.

[Character of ZERO3 series]

It applies 24 steps damping adjustment(needle valve type). It offers wide range of setting depend on the stage.

It's applied mono-tube shock absorber with newly developed large-caliber piston. It generate damping smoothly, so it's good to prevent over heating which meant suitable for competition.

It applies welding bracket with high-rigidity rib.

This product is rebuildable.

[Major spec] Needle valve type 24 steps damping adjustment, Overall length type adjusting, F:mono-tube inverted//R:mono-tube unturned shock absorber

Sport ZERO3S

| Model/Series | | Part No. | Price(excl.tax) | height adjust range | SP rate | U/M | Height adjust system | D.O.R. |
|--------------------|----|------------|-----------------|------------------------------|------------------|--------------|----------------------------------|--------|
| Lancer evolution - | *1 | 561 63S CN | ¥228,000 | F -60 ~ -18mm R -70 ~ 0mm | 8k(*2) 5k(*2) | P-AJ A-RG | Overall length Overall length | 20 Nov |

Competition ZERO3

| Model/Series | | Part No. | Price(excl.tax) | height adjust range | SP rate | U/M | Height adjust system | D.O.R. |
|--------------------|----|------------|-----------------|------------------------------|--------------------|--------------|----------------------------------|--------|
| Lancer evolution - | *2 | 561 63R CP | ¥248,000 | F -70 ~ -10mm R -60 ~ 0mm | 11k(*3) 10k(*3) | P-AJ P-RG | Overall length Overall length | 20 Nov |

*U/M=Upper mount, P-AJ =Camber adjustable Pillow upper mount, R-RG =Camber fixed Pillow upper mount, A-RG=Fixed camber Aluminium reinforcing rubber

*1 To install on Evolution, it would be needed to change Front drive shaft depend on camber angle or ride height.

*2 Changing spring rate is available on the order. Choose rate from :F:7-12k, R:5-11k.

*3 Changing spring rate is available on the order. Choose rate from :F:9-12,14,16k, R:8-12,14k.
