

## STRUT BRACES

**LEXUS SC400**  
**Toyota Soarer**  
**1991~2000 Z30**  
**(4.0L 1UZ-FE)**

Part No: 961 540 A  
 MSRP: \$200.00 (USD)  
 15,000 yen (JPY)

### OVAL SHAFT STRUT BAR

- Aluminum + oval design provides lightweight & rigidity
- 2 versions available for perfect fitment in each and every type of engine bay configuration.
- CUSCO blue steel end plates with superior design & craftsmanship

CUSCO has just developed an Lexus SC400 specific strut tower bar to meet the demands of the Lexus enthusiasts. These bars are different from our SC300 units, the only difference is that it clears the larger displacement engine (gives clearance to the intake manifold Lexus emblem) without any fitment issues.

Made specifically for the Lexus SC400 models equipped with the 1UZFE V8 engine., CUSCO strut tower bars are designed to minimize chassis flex between the strut tower points, keeping the suspension geometry in a static state while the vehicle is in motion. The strut bars are engineered inside and outside, meaning they are lightweight and still able to withstand the stress load present in the most prone areas of the vehicle. 100% made in Japan, but used all over the world.
