

CUSCO's products are produced and delivered to the customers, with full of feed backs from the real competition scenes.

Research and Development.

Test and re-designing in real competition scenes.

Make Prototype for production cars, and test again.

Production.

Logistics and delivery

All products are made with CUSCO's identities and knowledge.

From R&D, prototype and testing, to the production and improvement, each process are done in-house in CUSCO's production system. This system not only provides the higher reliability of the products, but also enables faster production of the items and production in smaller quantity.

All products are developed and designed by ourselves.

We are the only after market parts manufacturer that is "participating and winning" all top categories of Super GT, Rally, Dirt Trial, and Gymkhana. Through out the participation in all top categories, CUSCO test and develop the products, and check the performance and durability under most severe conditions.

All staffs are listening to the customer's voice

Our sales staffs frequently visit the distributors and retail shops all around Japan, listening to the valuable opinions and feedbacks to our products, as well as various market needs and clients demands. We also participate in the retail shops' events with the demo cars, talk and listen to the customers' voice directly, and bring them back and feedback to the products.

Introducing production system with high accuracy and efficiency.

Laser cutter
Automated machine precisely cut the metals, such as steel, aluminum, and stainless steels.

All manufacturing and production are organized under computer system, and all the data are gathered and controlled as well.

ISO 9001:2000

Certified for the Global standard in quality and service.
We are certified for the ISO9001 standard.

All products are made in Japan.

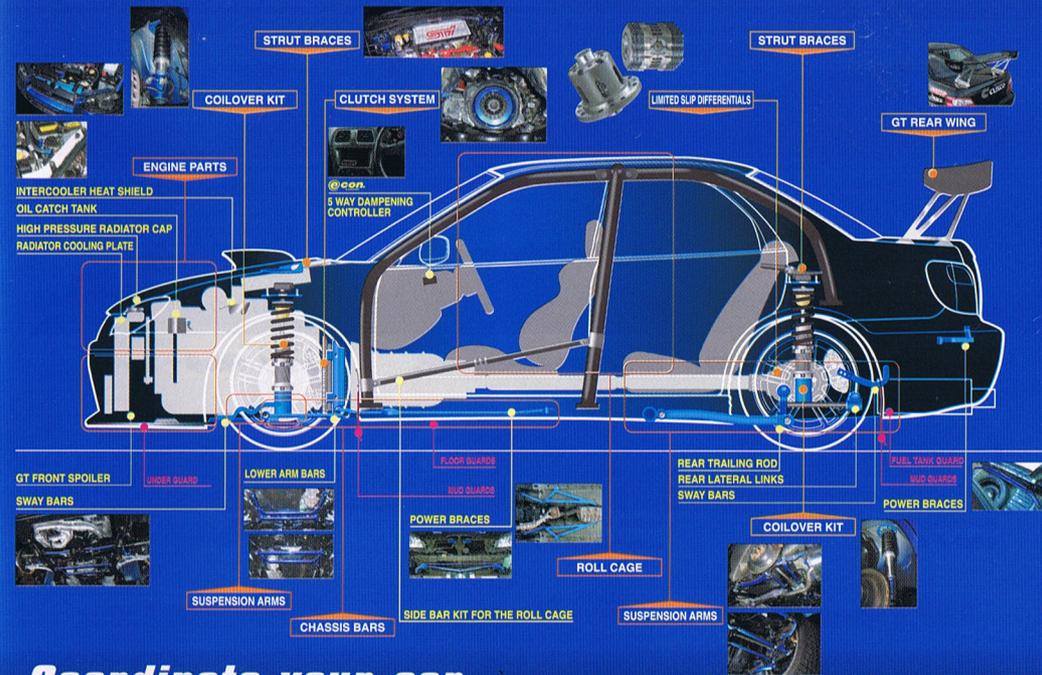

The CUSCO brand offers parts thoroughly researched and developed for those who prefer the authentic items. Real tuning parts, from the street legal parts to the competition parts, are born in the motor sport fields.

Coilover kits exclusively made for your wagon, minivan and SUV. Satisfaction guaranteed for those who prefer to drive more comfortable and stylish.

Safety21 is the brand for roll-cages and under protections. Safety 21 parts are researched and developed through competition fields, aiming to increase both safety and body rigidity.
