

TOYOTA 86 / SCION FR-S / SUBARU BRZ 2.0 LITER FA20 4U-GSE

IGNITION VOLTAGE CAPACITOR SYSTEM
+ VEHICLE SPECIFIC HARNESS

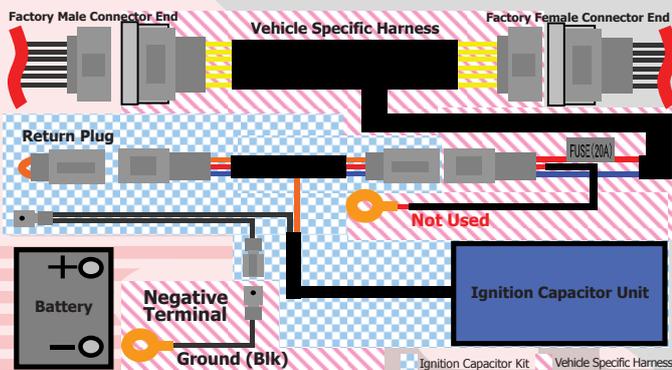

Ignition Capacitor
Part No: 965 726 A
MSRP: ¥16,000 (JPY)

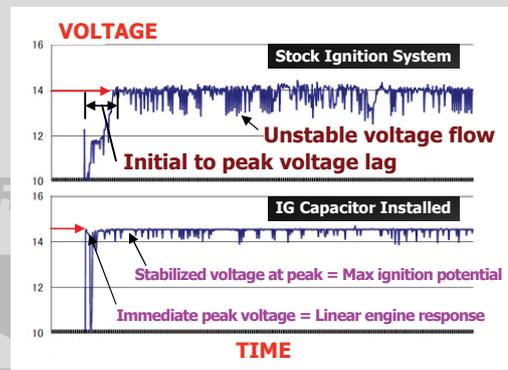

Toyota 86 / Subaru BRZ Harness
Part No: 965 726 H
MSRP: ¥33,000 (JPY)
**Other applications avail.*

- Improves engine response from low to high RPM range by supplying the ignition coil with stabilized power.
- Reduces resistance to battery so is ideal for vehicles equipped with additional aftermarket electronic components.
- Maximizes efficiency and voltage resulting in an increased torque feel as well as full power to all electrically powered components.

WIRING DIAGRAM

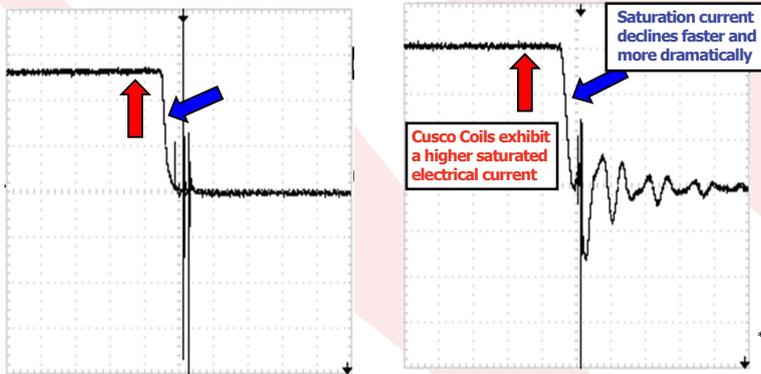

*This graph is a representation only and is not making guaranteed claims
*Results may vary depending on vehicle or condition

DIRECT IGNITION COIL SET

- Newly designed internal ignition coil design which produces increased spark maintained to high RPM range.
- Efficient filters effectively block out noise frequency while keeping stable ignition up to the upper revolutions.
- Promotes more efficient combustion, decreasing CO & HC ppm.
- Direct factory replacement unit, no modifications or wiring required.

Coil Saturation Interval

*This graph is a representation data tested on a Subaru EJ series engine.

Direct Ignition Coil
Part No: 965 768 A
MSRP: ¥85,000 (JPY)
**Other applications avail.*
