

CUSCO WATER TO OIL ENGINE OIL COOLER TOYOTA 86 & SUBARU BRZ (AT & MT TRANSMISSIONS)

PROTECT YOUR ENGINE BY
EFFICIENTLY MANAGING OIL TEMPS

Water to oil engine oil cooler have often been utilized in top level racing vehicles such as in the SuperGT machines. Cusco have decided to produce a kit exclusively for the 86 & BRZ (compliant with automatic & manual transmission equipped vehicles) since managing cooler oil temperatures play a vital role in engine efficiency, no matter what level of power output.

- Efficiently cools down oil temps when 130°C (266°F) is reached or exceeded.
- Brings oil to safe operating temp and reduces frictional heat during warm up.
- Heat exchange design features a 7 row core (4000KCal) for increased oil capacity.
- Enables a stable oil temperature range to protect the engine
- Effective in keeping down coolant temperatures (Based off test data from Cusco)
- Position/location/ducts is not an issue, like with air-oil coolers
- Works both on manual and automatic transmission equipped vehicles

Application: (ZN6) Toyota FT86, Scion FR-S, (ZC6) Subaru BRZ
Part Number: 965 012 AN
MSRP: ¥58,000 (JPY)

*Cutting the radiator hose is required for installation
