

10 Feb 2009

New additional for Cusco reinforcing clutch

**Copper Twin Clutch will be started to deliver from mid of February!**

**Price:** 198,000jpy (excluding tax)

**Eligible model**

**-SUBARU**

Impreza WRX GDB/GRB

Impreza Wagon GGB

**-MITSUBISHI**

Lancer CT9A

Lancer Wagon CT9W

**Major specification:**

- Disc size: 200 ( \*standard 240 )
- Tolerance torque: 700Nm
- Weight of Kit :GDB/GRB 12.9kg (compare to standard:79% )  
CT9A 12.5kg (compare to standard: 88%)

**Useful point about copper clutch**

- Compare to previous twin plate clutch, it has more tolerance. Also it's easy to use as well. It will perform multiple scenes from circuit to street.
- By apply strap drive system for centre plate(although it's multiple plate system), it saves uncomfortable noise and offer smoother feeling for clutch work.
- with 240 sized small disc, it offer sharp feel on clutch and better feel on shift work!
