

TOYOTA GR YARIS

SUSPENSION PARTS/BODY REINFORCEMENT PARTS, ETC. NEW RELEASE

1C7 311 B23

STABILIZER

- ◆ Parts that suppresses roll (tilt of the car) during cornering without changing the comfort of the ride.
- ◆ Increases the performance limit for both turning and straight-line stability. Provides a higher level of balance performance.

STRUT BAR

- ◆ Cusco`s standard reinforcement part. Effectively suppresses body strain.
- ◆ Lightweight aluminium and highly rigid oval cross section shaft. Mounting bracket made of steel with Cusco blue finish. Bolt-on installation.

1C7 540 A

POWER BRACE

- ◆ Increases body rigidity and suppresses body strain, unpleasant movement and aging deterioration due to twisting. Increasing the body rigidity helps increase the suspension performance which provides sharp handling.

FOLDABLE TOW HOOK

- ◆ A tow hook with a check ball that can be folded and fixed at 0 and 90 degrees with a single touch.
- ◆ Made of durable, integrally molded steel without welding. High strength. Stylish red coloured hook.
- ◆ Bolt-on mounting onto genuine tow hook mount hole.
