## SUBARU LEVORG VN5 SUSPENSION PARTS/ BODY REINFORCEMENT PARTS NOW ON SALE

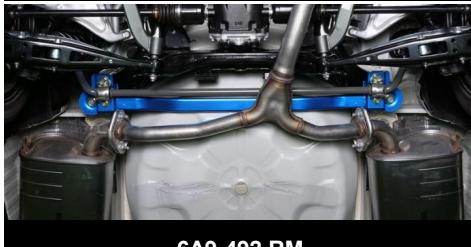

6A9 311 A26

6A9 540 A

6A9 492 F

6A9 492 RM

### STABILIZER

- ◆ Reduces body roll (tilt of the car) during cornering without changing the ride comfort.
- ◆ Increases steering response and driving stability even during high speed. Installing both front and rear drastically increases stability.

### STRUT BAR

- ◆ Cusco's classic body reinforcement part. Effectively suppresses body flex.
- ◆ High rigidity lightweight aluminum with an oval cross section shaft. Mounting bracket made of steel with Cusco blue finish. Bolt on installation.
- ◆ The rear is a quick release type that allows the shaft to be detached or attached without using tools. The shaft can be easily removed for more luggage compartment.

### POWER BRACE

- ◆ Increases body rigidity, suppresses body flex, reduces unpleasant movements and aging deterioration due to body twisting. By increasing the body rigidity, this enables optimal suspension movement at the intended geometrically aligned state and sharpens handling.

«Applicable Vehicle»  
Subaru Levorg VN5

Product Name	Location/Type/Specifications		Part Number	Price (Excl. Tax)	JAN Code	Reference Installation Time	Release Date
Stabilizer	Front	Solid 26Φ/Genuine Ratio 150%	6A9 311 A26	¥30,800 ( ¥28,000 )	4996338062697	0.5h	NOW ON SALE!!
	Rear	Solid 21Φ/Genuine Ratio 165%	6A9 311 B21	¥27,500 ( ¥25,000 )	4996338062703	0.5h
