REAR DIFFERENTIAL MOUNT/ PITCHING STOPPER/ FOLDABLE TOW HOOK NOW ON SALE

6A1 489 A

6A1 911 PS

693 017 R Product Image

Reinforced Rear Differential Mount

- ◆ High strength steel box structure with reinforced bushing. Suppresses movement of the rear differential carrier and provides direct traction. Genuine mount replacement type. (Bush press fitted, bolt on installation)
- ※ Since the product emphasizes direct traction performance, noise and vibration during driving may increase compared to normal.

Reinforced Pitching Stopper

- ◆ Uses a high tensile rubber bush that controls movement of the engine and transmission in the front-rear motion, improves response during acceleration and deceleration and improves shifting.
- ◆ Machined aluminium, blue alumite. Bolt on installation.
- ※ Installing this product may cause vibration and sound to be transmitted easily.

Foldable Tow Hook

- ◆ Swivel tow hook that can be folded and fixed at 0 and 90 degrees with a single touch.
- ◆ Made of durable injection molded steel without welding. High strength.
- ◆ Stylish hook in red colour.
- ◆ Bolt on installation onto genuine tow hook mount point.
