

NEW PRODUCT INFORMATION

SUBARU WRX S4 VBH STABILIZER BAR/ BODY RIGIDITY PARTS/ TOW HOOK NEW RELEASE

«Applicable Vehicle»
Subaru WRX S4 VBH

Stabilizer Bar

- ◆ Reduces body roll (tilt of the car) during cornering without changing the quality of the ride.
- ◆ Increases steering performance and driving stability even during high speed. Installing both front and rear drastically increases balance and stability.

Strut Bar

- ◆ CUSCO's classic body reinforcement part. Effectively suppresses body flex.
- ◆ High rigidity lightweight aluminium with an oval cross section shaft.
- ◆ The rear comes with quick release levers which allows easy detachment of the shaft from the brackets.

Power Brace

- ◆ Increases body rigidity, suppresses body distortion, reduces unpleasant movements and aging deterioration due to body twisting. By increasing the body rigidity, this enables optimal suspension performance and sharpen handling.

Foldable Tow Hook

- ◆ Can be tilted 0 or 90 degrees.
- ◆ Bolt-on installation.

Product Name	Location/Type/Specifications	Product Number	Price (incl. tax)	JAN Code	Installation Time	Release Date
Stabilizer Bar	Front	Solid Φ26/ Genuine Ratio 150%	6A9 311 A26	¥30,000 (¥33,000)	4996338062697	0.5H
	Rear	Solid Φ21/ Genuine Ratio 138%	6A9 311 B21	¥28,000 (¥30,800)	4996338062703	0.5H
