

GR86 & NEW BRZ CC PILLOWBALL UPPER MOUNT OIL PAN BAFFLE PLATE, ETC. NEW RELEASE

«Applicable Vehicle»
GR86 ZN8/BRZ ZD8

CC Pillowball Upper Mount

- ◆ Pillowball upper mount that enables camber and caster adjustment with a unique designed mechanism (patented).
- ◆ Unlike the conventional camber adjustable pillowball upper mount, it is possible to adjust the caster settings independently in addition to the camber adjustment (2 directions). Camber + caster setting range can be widened.
- ◆ Since the camber and caster adjustments are stepless, the angle can be adjusted in decimal units.
- ◆ Able to adjust the camber and caster settings while installed to the vehicle.
- ◆ Designed to minimize compression stroke reduction. (Compared to camber-adjustable pillowball upper mount, the compression stroke is reduced and vehicle height is increased.)
- ※ When equipped with the genuine shock, the vehicle height will increase by 23mm.

Oil Pan Baffle Plate

- ◆ Prevents engine oil deviation in the oil pan and engine trouble caused by poor oil suction due to inertial forces from lateral G force. Equipped with a heat-resistant rubber check valve that has been proven in racing, etc., which prevents the oil that has flowed down into the oil pan from shifting due to splashing.

Stainless Mesh Clutch Line

- ◆ For a direct feel by suppressing hydraulic expansion of the clutch line.
- ◆ Ideal for vehicles with high load on the clutch line due to installation of reinforced clutch or delicate clutch work.
- ◆ Tough clutch line with 3-layer structure. PTFE (Teflon) hose with excellent heat, pressure and chemical resistance used for the core tube then covered with tough stainless mesh hose to suppress expansion due to internal pressure. Furthermore, the structure is covered with a PVC (polyvinyl chloride) tube with excellent weather resistance.
- ◆ Genuine shape, bolt on replacement with CUSCO logo sleeve.
